

Putting expertise right in your hands

MENTOR EM AND PROBE KITS

Early detection of surface defects on metal parts is critical to avoid re-work or scrap costs. So, inspections must be carried out with the right flaw detector and probe.

Our eddy current inspection probe kits and the Mentor EM device ensure that inspectors of all levels have the complete toolset for fast, easy and reliable surface inspection.

Mentor EM

Waygate Technologies' flagship portable eddy current flaw detector has excellent signal-to-noise ratio and high-resolution display. It enables easy and efficient nondestructive testing for weld, rotary and general-purpose inspections.

Its user-centered application workflows and onboard Wi-Fi capability enable inspectors to easily communicate with each other remotely or on-site.
